TEXTILE WORLD

INDEX TO VOLUME 97

JANUARY to DECEMBER, 1947

McGRAW-HILL PUBLISHING CO.
Bragdon, Lord & Nagle Division
330 West 42nd St., New York

General Alphabetical Index

A

Accounting—tenths of yard instead of eighths ..... Jan. 166
Alabama Textile Operating Executives meeting (F) ..... Feb. 135
Better weaving discussed at meeting (F) ..... July 127
American Assn. of Textile Chemists & Colorists Northern New England Section wins contest (F) ..... Nov. 133
Reports presented at meeting ..... Dec. 139
Silver Jubilee convention (F) ..... Jan. 139

C

Cotton—handling cotton bales ..... Aug. 144
Fiber testing aids the cotton classer. Seth Carter (F) ..... Nov. 110
Cotton Manufacturing
Air conditioning pays off in four Southern mills (F) ..... Aug. 111
Air-deflector plates improve card selvages ..... Oct. 162
Air diffuser is adjustable. H. A. Baker (F) ..... May 141
Air filtering for yarn-package drying. H. L. Dozier (F) ..... June 135
Alabama mill men reveal carding practices ..... Dec. 145
Aluminum bobbin for use with adapter ..... Oct. 216
Aluminum has many uses in textile equipment. Charles Braglio (F) .. Apr. 125
American system is based on cotton machinery. R. J. McConnell (F) . Mar. 110
American version of Sulzer loom .. June 147
Avondale Mills finds materials handling offers opportunities to save. P. M. Thomas (F) ..... Nov. 120
Avondale Mills installs hot-air slasher. W. E. Williams (F) ..... Oct. 133
Baling-tie paint in cotton causes processing trouble ..... May 178
Ball-bearing top rolls reduce costs. Sept. 169
Ball warps and cloth rolls protected .. June 160
Barmag twister ..... July 150
Basle Fair focus for Swiss machinery. Harry Seligman (F) ..... June 137
Better weaving is aim of Alabama men (F) ..... July 127
Bleaching-range efficiency. Murphy & Pollock (F) ..... Apr. 119
Blender feeder ..... May 232
Bobbin refinishing machine ..... Aug. 148
Bolster cleaner ..... Oct. 152
Brine equipment on lease basis .... July 154
Broken lay ends prevented by brace ... Feb. 160
Buffer positions shuttle and prevents rebound ..... Aug. 150
Bumper on spooler-knotter ..... Sept. 182
Burrs on doffer comb removed by sand in box ..... July 162
California finishing plant expands 150% since 1941. R. L. Bean (F) ..... Feb. 137
Cardboard and carbon paper tests roll pressure ..... July 162
Carding details need close attention (F) ..... May 137
Carding techniques undergoing change (F) ..... Feb. 127
Cationic softeners give permanent finish. C. N. Rabold (F) ..... Feb. 147
Circular loom developed by France. Nov. 162
Cleanliness is essential to quality winding. P. M. Thomas (F) ..... Aug. 120
Cloth conditioned by evaporated water ..... Oct. 150
Cloth lowerer handles 120 rolls per day (F) ..... Mar. 103
Cloth roll collapses for removal .... May 231
Cloth rolls made of aluminum .... Jan. 150
Cloth-roll piece-up sticks held in place ..... Nov. 176
Cloth-room machines handle large rolls ..... Feb. 154
Cloth take-up eliminates sewing .. Sept. 292
Collector replaces bottom clearers .. Apr. 126
Conditioning time indicated by color .. May 168
Continuous bleaching successful on colored-yarn goods. D. S. Quern (F) . July 131
Continuous peroxide bleach. E. D. White (F) ..... June 141
Control laboratory is expensive to install ..... Nov. 198
Conveyor cuts handling and saves floor space. H. R. Moore (F) ..... July 143
Conveyor steamer speeds preparation of cotton goods. C. N. Rabold (F) .. July 104
Costs cut by dyeing slasher. W. A. Newell (F) ..... Sept. 155
Cost knowledge vital to efficiency. L. F. Sawyer (F) ..... Nov. 155
Cotton card ..... Mar. 146
Cotton comber—blueprint to quality. C. D. Welch (F) ..... May 108
Cotton roll blanket gives smoother sized yarn ..... Feb. 174
Cottonless cotton mill (F) ..... Sept. 147
Cotton-woolen fabrics bleached as wool ..... Sept. 212
Decating controller ..... May 236
Design of twill line ..... Sept. 198
Detachable box base useful for wet goods ..... Dec. 172
Direct spinning frame ..... Sept. 174
Direction of yarn twist affects warp twill line ..... Mar. 172
Drop-wire contact bars should be kept off floor ..... June 160
Educate loomfixers before installing looms ..... Jan. 168
Efficiency determines weaver's loom assignment ..... Mar. 174
Electric feeler used with metallized bobbins ..... Oct. 150
Electric heating pad dries printed fabrics ..... Feb. 154
Electronic controller regulates tensions ..... Sept. 176
Electronic straighteners of two types. D. Eldred (F) ..... Oct. 123
Electronic warper drive gives constant yarn speed. R. J. Demartini (F) .. Apr. 121
Ends-down tests reveal spinning troubles. Gunther & Gross (F) ..... Dec. 112
Europe fertile in machinery ideas. Rene Bouvet (F) ..... June 127
Every "pick up" adds to handling cost. C. M. Bowden (F) ..... May 104
Feed-guide plates useful in formation of picker lap ..... Apr. 132
Feed-plate extension improves lickerin feed ..... Sept. 185
Fiber extensometer ..... Aug. 143
Fiber properties determine combed-yarn quality. Webb & Richardson (F) ... Oct. 145
Fiber sample dryer ..... Feb. 156
Fiber-test data. P. M. Thomas (F) .. June 120
Financing can be fitted to mill's circumstances. E. T. Neville (F) ..... May 111
Finishing ranges efficient and flexible. C. N. Rabold (F) ..... Oct. 106
Finishing tanks of terra-cotta .... Mar. 152
Fire-resistant agents reduce flame danger in cottons. Taylor & Dishman (F) ..... Apr. 113
Fixers should know how to set builder. Gunther & Gross (F) ..... Oct. 139
Flat-brush bristles replaced with burnishing wire ..... Dec. 176
Flow chart for cotton (F) ..... Jan. 101-120
Formula calculates picks per inch .. Dec. 168
Formula to calculate yarn weight per cubic inch ..... Feb. 174
Gage for setting picking shoes ..... May 174
Gas-fired curing ovens do not cause fading ..... June 166
Gel strength measured by new device .. Oct. 234
Georgia mill reports on 48-in. loom beam (F) ..... Dec. 135
Hacoba quiller achieves high production (F) ..... July 118
Hand truck aids doffing of cards .. Nov. 180
Homemade gage used for setting rolls .. Feb. 164
Horizontal padder is six machines in one ..... May 162
Horsepower per spindle figured from formula ..... Feb. 182
Idler cone on picker provided with adjustment ..... May 166
Improper winding of cloth corrected .. Nov. 178
Indirect labor can be accurately controlled. T. H. Gallier (F) ..... Apr. 106
Inspecting machine ..... Nov. 164
Inspection frames measure cloth ... July 152
Japanese spinning frames are not superior to U. S. ..... Apr. 144
Jersey cloth finishers have trouble with bow ..... Oct. 174
Jumping card coiler held by z-shaped stop ..... May 174
Knee in clothing wire prevents roughing up ..... July 170
Knitting yarns require skillful preparation. R. M. McNeal (F) ..... Mar. 116
Laboratory machine gives data on continuous dyeing. C. L. Zimmerman (F) ..... Dec. 116
Lap-preventer kink improved by felt cover ..... Sept. 186
Lever and fulcrum aid in moving stirrup ..... Aug. 159
Lickerin screens set with adjustable gage ..... Oct. 158
Life of loom parts ..... July 184
Lifting rod aids inspecting patterns .. Sept. 186
Lock back-roll gear to avoid cutting down ends ..... June 152
Locust-bean gum used in finishing .. Apr. 159
Long draft must retain fiber control. Seth Carter (F) ..... June 108
Low-groove shuttle prevents jerked-in filling ..... Sept. 170
Lowell Textile Institute celebrates Golden Anniversary (F) ..... May 159
Machine for single or double wrapping ..... Aug. 144
Magnetic separators ..... Apr. 274
Markers on loom box used for setting picker ..... Nov. 174
Marketing and technology share forum at National Textile Seminar (F) . June 133
Materials-handling cost offers savings. C. M. Bowden (F) ..... Jan. 121
Materials handling used in extracting and drying (F) ..... Oct. 143
Maturity of cotton tested in mill's dye room ..... Nov. 182
Metallizing useful in textile machine shop. Roy Campbell (F) ..... Dec. 106
Meters check linear speed ..... Sept. 180
Microscope camera ..... Aug. 150
Mile-a-minute traveler must be right. Seth Carter (F) ..... Sept. 161
Mill purchases reach new high level. C. W. Bendigo (F) ..... Feb. 105
Missouri offers opportunity for textile development ..... Oct. 224
Modified cam reduces sloughing-off . Feb. 164
Moist-air slasher made in Britain .. Oct. 152
Moisture content determined ..... Dec. 164
Moisture determined in a minute .... July 156
Napping flannel. E. D. White (F) .. Dec. 131
National Safety Council presents award to Avondale Mills (F) ..... Mar. 143
New dye technique shows "maturity" of cotton. Goldthwait, Smith & Barnett (F) ..... July 105
New emulsions for textile printing (F) ..... Sept. 143
New machine dyes, sizes, beams continuously ..... Aug. 143
New method cuts time to install loom parts (F) ..... Oct. 118
New opener room designed for best cleaning. E. A. Bentley (F) .... Apr. 104
New system spins yarn from sliver. P. M. Thomas (F) ..... Aug. 126
1947 textile volume close to 1946. Sanford Parker (F) ..... Feb. 102
Nylon bolsters effect savings ..... Sept. 169
Nylon-plastic traveler permits higher speeds ..... Apr. 126
Oily-filling rack improves housekeeping ..... Aug. 164
Oscillating roll holder ..... Mar. 156
Pacolet refrigerated spinning room air-conditioning. C. M. Bowden (F) .... July 120
Pattern and needle setting may cause drop stitches ..... Oct. 170
Permanent magnets reduce fires and damage ..... Aug. 118
Permanent sizes approved by test in Quartermaster project at Institute of Textile Technology (F) ..... Feb. 122
Picker shim throws shuttle straight .. July 166
Picker-stick economy. H. E. Wenrich (F) ..... Aug. 124
Pile-fabric loom ..... Jan. 145
Pin-dryer operation aided by signal lights ..... Dec. 178
Pin-dryer operator builds ladder on machine ..... Apr. 134
Pin holes in shearing prevented .... Oct. 160
Place drop-wires on warp before putting warp in loom ..... Oct. 165
Plied selvage yarn aids slashing .. Jan. 152
Plying two ends of yarn on a winder .. Nov. 174
Precision tester ..... Nov. 166
Process control device ..... Jan. 146
Public relations program (F) ..... May 149
Pull-skein winder doffs automatically .. Feb. 156
Rack for spools of yarn ..... Dec. 174
Reducing warp stretch by cutting down roll ..... Aug. 159
Report from India on textile-industry developments. J. K. Van Denburg, Jr. (F) ..... Sept. 108
Resist-printing demands close attention to details. T. N. Patrick (F) .... Mar. 139
Revolving creel useful on some winders ..... July 165
Dan River completes research organization. C. M. Bowden (F) ..... Mar. 104
Rivet brake linings at proper points .. June 156
Roll covering conducts electricity .. July 149
Roller-pressure pull measured by indicator ..... Sept. 180
Saco-Lowell announces machinery improvements ..... Nov. 164
Sandwich blend made mechanically .... Oct. 149
Scissors of new type ..... Feb. 224
Scutcher, stainless-steel ..... Dec. 166
Selvage loops prevented by filling control ..... Dec. 176
Semiautomatic doffing needed for spinning ..... Nov. 186
Separating pins prevent shady filling .. Aug. 156
Sewing machine pulleys will align themselves ..... June 156
Shape of box binders can cause much loom trouble. H. E. Wenrich (F) ... Feb. 125
Shuttle-box stop prevents loom damage ..... June 154

(F) indicates feature article

Shuttle with increased capacity....Nov. 166
Skein reelers .....Jan. 146
Slack washer has partitioned tank... Dec. 164
Slasher announced by West Point..Nov. 158
Slasher room automatic controls. P. M. Thomas (F).....Sept. 135
Slashing practices discussed by Alabama Textile Operating Executives (F)... July 139
Slashing practices receive close attention (F) .....Nov. 145
Slipping of weaver's knot.....Feb. 188
Sliver and yarn tester.....Mar. 148
Slub-catcher anvil for abrasive yarns.. Oct. 150
Slub effect in cloth can be attained by design .....Jan. 174
Small blending plant might be successful .....Apr. 154
Small cores in beams no benefit. R. J. Demartini (F) .....Jan. 133
Spain's textile mills. C. S. Underwood (F) .....July 101
Spindle efficiency increased by ball-bearing .....Aug. 160
Spinning refinements favored by Alabama mill men (F).....Feb. 135
Spinner's task can be set quickly. Gunther & Gross (F).....Apr. 108
Spinning machine drafts without rolls. C. W. Bendigo (F).....Mar. 113
Spinning technology advanced by Georgia mills (F).....May 155
Spooler-drum laps removed with hook Oct. 160
Spooler slub catcher prevents use of magazine .....Jan. 166
Spray for tinting.....June 156
Spring-needle machines need non-skid stop .....Oct. 160
Squeeze-roll cover of synthetic rubber Sept. 176
Starch handler eliminates waste..Nov. 160
Static eliminator is self-contained..Feb. 154
Steel roll cleaner.....Oct. 218
Stiffness tester .....Sept. 172
Storage practices contribute to fire losses. A. L. Brown (F).....Apr. 100
Storing full beams aided by wooden rests .....May 170
Stream-sanitation research is four-fold (F) .....July 125
Surface temperature continuous control Dec. 156
Survey reveals plans for construction, renovation and modernization of mills (F) .....Nov. 104
Swatch filing cabinet.....Jan. 146
Swing guider .....Dec. 156
Swiss machines, new, now available.... Dec. 162
Swiss warp-tying machine.....Dec. 156
Table used for figuring weight of yarn Dec. 172
Tensile strength tester.....Nov. 162
Tension device aids trimming shuttle fur July 158
Test of warp size is in the weaving. Dr. P. V. Seydel (F).....June 125
Tester for textiles.....Mar. 146
Tester measures yarn shift in fabric.. Jan. 148
Textile dip under way. Sanford Parker (F) .....May 101
Textile Exposition fills Grand Central Palace (F) .....July 147
Textile industry's expenditures in 1947. W. B. Dall (F).....Nov. 101
Textiles move on wheels (F).....Feb. 131
Textile plants in the South. F. S. Lewis (F) .....Apr. 115
Textiles show power to reach new heights. W. B. Dall (F).....Feb. 101
Third and fourth shuttles operate as first, second .....Oct. 162
Time saved in picking double leases.. Dec. 174
Tongue and groove compresses drawing sliver .....Apr. 148
Trash in cotton lowers grade and color. Dorothy Nickerson (F).....Aug. 130
Twist multipliers for good plied yarns.. Jan. 164
Twist-setting installation improves mill's weaving. C. M. Bowden (F).....May 116
Twister rolls have chrome-plated finish Dec. 160
Ultrasonics being used on textiles..July 220
Ultraviolet light used for testing cloth May 172
Uniform yarns made by modern machines. J. J. Mills (F).....June 143
Unit dries samples.....Aug. 152
USA 1950-1960 (F) [Forecast by 20th Century Fund] .....May 121-136
Vacuum-stripping plate should be beveled .....Dec. 178
Vat and azoic colors preferred for printing. Dr. A. K. Saville (F).....Aug. 122
Warper-shaft extension aids in removing brakes .....Nov. 176
Warper thread-roll nut requires special tool .....Sept. 190
Weaving can be improved by attention to details (F).....Feb. 151
Weaving method yields single-pick effect May 177
Weaving results influenced by lug straps. H. E. Wenrich (F).....May 151
What are the qualifications of card-room cleaners? .....Oct. 178
Why is knee wire needed for card clothing? .....May 178
Wild filling can be easily studied. C. D. Brown (F).....Nov. 114
Williams unit changes dye techniques. S. H. Williams (F).....May 143
Winder aided by slide-rule calipers.Oct. 154
Winder guideway set with gage....May 172
Winder requires no yarn tension...Mar. 161
World textile production—symposium (F) .....Feb. 106
Wrinkle-resistance gage .....Dec. 158
Wrong ends reduced by educating weavers .....Nov. 173
Wrong type of quill should not be used Oct. 166
Yarn-conditioning device .....May 236
Yarn-tension tester .....July 156
Cotton Textile Institute—report of meeting (F) .....Dec. 153

D

Defects—fewer fabric defects can now be allowed. F. H. Brook (F).....June 114
Ribbon weaving defects cause heavy-shade filling bars.....July 172

Designing

Knitted fabric has great facility for fancy patterns. C. R. Carter (F)... Dec. 132
Knitting pattern fields pre-planned... Dec. 180
Monofilament techniques may be applied to Plexon (F).....Jan. 143
Pencil stripe in worsted requires clean-cut weave. R. B. Sendren (F)..Jan. 137
Slub effect in cloth can be attained by design ... .Jan. 174
Ribbons with plain patterns may be cut after printing .....May 182
Spiral designs versatile in circular knitting. Karel Rehak (F).....Sept. 165

Dyeing and Finishing

AATCC Silver Jubilee convention (F).. Jan. 139
Air bells can be eliminated in wool raw-stock dyeing. Holger Thuemmel (F) Mar. 125
Aluminum has many uses in textile equipment. Charles Braglio (F).... Apr. 123
American Assn. of Textile Chemists & Colorists contest won by Northern New England Section (F).....Nov. 133
Bemberg rayon printing aided by use of glycerin .....Oct. 160
Better finishes at less cost is goal of industry. Rabold & Marius (F)...Feb. 114
Bleachery aids flow of chlorine with water on cylinder.....Mar. 158
California finishing plant expands 150% since 1941. R. L. Bean (F).....Feb. 137
California law bans "inflammable" textiles (F) .....Jan. 218
Cationic softeners give permanent finish. C. N. Rabold (F).....Feb. 147
Cationic softeners have desirable properties .....Sept. 203
Check these points for even shades in woolens .....Feb. 176
Chlorination process improved for wool shrinkage control. Leonard Shapiro (F) .....Nov. 151
Circular-knit finishing. Irving Teplitz (F) .....June 129
Cloth guard needed over sewing machine gears .....Mar. 158
Color matching by standard daylight lamps .....Oct. 234
Conversion method aids plant and laboratory .....Jan. 154
Costs cut by dyeing slasher. W. A. Newell (F) .....Sept. 155
Cost of skein dyeing is almost prohibitive .....May 188
Cotton-fiber color unaffected by trash.. Dec. 184
Cotton flow chart (F).....Jan. 101-120
Decating controller .....May 236
Drying is important in shrink-proofing wool. K. H. Barnard (F).....Apr. 102
Dye beck .....Nov. 164
Dye behavior varies on chlorinated wool (F) .....Dec. 118
Dyeing process uses molten metal (F).. Sept. 133
Efficient laboratory a "must" for modern finishers (F) .....Mar. 129
Electric heating pad dries printed fabrics .....Feb. 154
Electricity is not used for heating due baths .....Feb. 180
Emulsion in tank stirred continuously. Nov. 180
Estimation of vat printing paste on cloth and an electrometric analysis of the critical chemical. H. E. M. Specht.. Dec. 141
Finishing ranges efficient and flexible. C. N. Rabold (F).....Oct. 166
Fire-resistant agents reduce flame danger in cottons. Taylor & Dishman (F) Apr. 113
Graph curves are for practical use..Jan. 182
High-temperature water as heat carrier. V. R. Freeman (F).....Jan. 129
Instruments measure calender production .....Dec. 194
Jersey-cloth finishers have trouble with bow .....Oct. 174
Knit-cloth dyehouse thrives on diversity. Irving Teplitz (F).....Mar. 121
Knit good bleached continuously. W. A. Newell (F) .....Dec. 108
Laboratory machine gives data on continuous dyeing. C. L. Zimmerman (F) Dec. 116
Locust-bean gum used in finishing..Apr. 159
Materials-handling used in extracting and drying (F).....Oct. 143
Mechanical printing equipment....Dec. 160
Napping flannel. E. D. White (F)..Dec. 131
New dye technique shows "maturity" of cotton. Goldthwait, Smith & Barnett (F) .....July 105
New emulsions for textile printing (F).. Sept. 143
New machine developments for knitting and finishing. G. B. M. Walker (F).. Feb. 112
New machine dyes, sizes, beams continuously .....Aug. 143
Nylon-hose dye shows good wash fastness. C. M. Bowden (F).....Aug. 128
pH meter .....July 149
Permanent finishes on rayon. Leonard Shapiro .....Dec. 141
Pile-fabric dye kettle.....May 162
Positioning machine for screen printers July 149
Processes used for printing woolens.Nov. 196
Resin treatment improves fiber strength Dec. 162
Resist printing demands close attention to details. T. N. Patrick (F)....Mar. 139
Ribbon weaving defects cause heavy-shade filling bars.....July 172
Rope squeezer has adjustable pressure Nov. 158
Saturated brine reduces costs at Dan River. Norman Agnew (F).....Aug. 135
Screen-printing machine prints 2 to 15 colors .....May 161
Screen-printing plant achieves line production. H. S. Knowlton (F)....May 106
Screen-printing plants use few festoon machines .....July 184
Shades in worsted goods may result from alkali .....July 178
Silk-screen printing method which eliminates long tables.....Oct. 236
Singeing speeds improved by "radiant-flame compression". J. C. Moore (F) June 112
Singeing unit, portable.....July 156
Splashboard protects rayon-tinting operator .....Feb. 166
Starch handler .....Nov. 160
Steam-ejection system distributes dye evenly .....Mar. 145
Stream-sanitation research is four-fold (F) .....July 125
Survey reveals plans for construction, renovation and modernization of mills (F) .....Nov. 104
Tanks, stainless-steel, have lattice bottoms .....May 231
Tumble-jar tester .....Aug. 150
Ultraviolet light used for testing cloth.. May 172
Uses of pH values are manifold....June 172
Varnish prevents deposit of silicate..Aug. 164
Vat and azoic colors preferred for printing. Dr. A. K. Saville (F)..Aug. 122
Washer, tight-strand, utilizes stainless steel .....July 149
Water demineralizer .....Aug. 146
Wet finishing of jersey may be semi-continuous .....May 186
Williams unit changes dye techniques. S. H. Williams (F).....May 143
Wool flow chart (F).....Aug. 101
Wool raw stock processed in modernized dyehouse. M. H. Hudson (F).....May 112

F

Fibers

Acrylonitriles—a new class of synthetic fibers. J. V. Sherman (F).....Mar. 101
Cottonless cotton mill (F).....Sept. 147
Industrial fabrics. C. W. Bendigo (F) May 4
Nylon-plastic traveler permits higher speeds .....Apr. 126
Nylon throwing improvements. G. B. Walker (F) .....Apr. 97
Permanent magnets reduce fires and damage (F) .....Aug. 118
Precision tester .....Nov. 166
Velon filament makes soft-hand fabrics Apr. 127

Fire Protection

California law bans "inflammable" textiles (F) .....Jan. 218
Cotton-storage practices contribute to fire losses. A. L. Brown (F).....Apr. 100
Fighting flash fires.....Nov. 170
Fire-resistant agents for cottons. Taylor & Dishman (F) .....Apr. 113

Flow Charts

For cotton-type mills (F).....Jan. 101–120
Knitting flow chart (F).....Apr. 89– 96
Wool flow chart (F).....Aug. 101–110

G

Germany—Denkendorf reports disclose advanced technology (F).....Mar. 133
Dyeing process uses molten metal (F). Sept. 133
Great Britain—wool developments look to finer fabrics. Henry Phillips (F).Feb. 242

H

Hosiery

Air conditioning in modern hosiery mill. H. B. LeFeaux (F).....Sept. 129
Belvidere—the house built for full-fashioned knitting. C. M. Bowen (F) Nov. 116
Brine handling system.....Oct. 156
British are building full-fashioned machine .....June 150
400 needle machine knits seam-free hose Apr. 127
Full-fashioned hosiery machine....June 148
Full-fashioned machines require good lubrication. H. B. LeFeaux (F)..Dec. 143
Full-fashioned machines travel by special delivery. C. M. Bowden (F).. July 114
Half-hose mending arm.....Oct. 156
Half-hose knitters should try soluble yarn .....Apr. 134
Handling system need not be expensive. E. D. White (F).....Oct. 120
Inclosure for thread reduces skipped stitches .....Jan. 158
Instruction saves half-hose quality. C. W. Arrowood (F).....Nov. 137
Knitting Arts Exhibition—guide to exhibitors .....Apr. 193
Knitting flow chart (F).....Apr. 89–96
Mirror useful in straightening needles.. Nov. 178
Modified yarn carrier reduces nylon press-offs .....July 160
Nylon-hose dye shows good wash fastness. C. M. Bowden (F).....Aug. 128
Nylon staple in hosiery. Dr. W. B. Vincent .....Dec. 141
Nylon throwing improvements. G. B. M. Walker (F) ..... Apr. 97
Pairer's rate of pay must include all styles .....Mar. 170
Pulled threads in hose caused by handling .....June 168
Readjustment made in knit goods. S. S. Parker (F).....Aug. 116
Roll on balancing arm lengthens life of parts .....May 170
Runs in nylon hose prevented by cardboard .....May 168
Sealed construction featured in new hosiery mill. W. A. Newell (F)..Oct. 112
Seamless-hosiery machine .....Feb. 153
Stitch-adjusting screw for coarse-gage ribbers .....June 158
Stripping of nylon size may be due to humidity .....July 174
Survey reveals plans for construction, renovation and modernization of mills (F) .....Nov. 104
Tester for evaluating the snag resistance of nylon hosiery. Smith & Johnson (F) .....Dec. 139
Throwing plant has many-sided program. C. W. Bendigo (F).....Nov. 127
Thrust-bar screw holes repaired with washer .....Feb. 166
Topping stands and bars involve an extra operation .....Feb. 178

I

India—Mother India is rearing a modern textile industry (F).....Sept. 107
Report from India on textile industry developments. J. K. Van Denburg, Jr. (F) .....Sept. 108

K

Knit Goods

Air removes lint from needles.....Sept. 176
Bleaching knit goods continuously. W. A. Newell (F).....Dec. 108
Circular-knit finishing. Irving Teplitz (F) .....June 129
Circular knitting requires accurate yarn feeding. H. Wignall (F).....July 133
Cone holder reduces mills' press-offs... Nov. 176
Double-tricot machine .....Apr. 274
Fancy patterns in knit goods. C. R. Carter (F) .....Dec. 132
Full-fashioned machines used for knitting neckties .....May 184
Have you thought of the tuck stitch lately? Harry Wignall (F).....Aug. 137
Holder aids in welding small knitting parts .....Sept. 185
Inspection aids sewing-machine upkeep. E. D. White (F).....Mar. 131
Knit-cloth dyehouse thrives on diversity. Irving Teplitz (F).....Mar. 121
Knitted carpet fabrics require additional body .....Mar. 164
Knitting Arts Exhibition—guide to exhibitors .....Apr. 193
Knitting company installs tricot machines (F) .....Jan. 124
Knitting Exhibition—new machines and improvements (F) .....May 117
Knitting flow chart (F).....Apr. 89–96
Knitting machine for jacquard-type production .....Mar. 145
Knitting pattern fields pre-planned.Dec. 180
Knitting yarns require skillful preparation. R. M. McNeal (F).....Mar. 116
Lockstitch machine has top-roller feed Nov. 160
Lockstitch sewing machine.....Mar. 146
Mirror useful in straightening needles.. Nov. 178
New machine developments for knitting and finishing. G. B. M. Walker (F).. Feb. 112
Outerwear machine rights sought by U. S. builder.....Jan. 145
Pile carpet knitting—British patent. Harry Wignall (F).....Nov. 149
Readjustment made in knit goods. S. S. Parker (F).....Aug. 116
Return to silk means knitting changes. K. A. Hahn (F).....Jan. 131
Rib knitting machines can produce flat fabrics .....June 166
Saxon inch is used for some machine gages .....Mar. 174
Spiral designs versatile in circular knitting. Karel Rehak (F).....Sept. 165
Spring-needle machines need non-skid stop .....Oct. 160
Spring-needle oiler aids in clearing stitches .....Aug. 156
Starting a knitting mill poses many problems .....Aug. 178
Stop motion protected on knitting machine .....July 154
Survey reveals plans for construction, renovation and modernization of mills (F) .....Nov. 104
Three new knitting machines.....Sept. 170
Tricot knitting machine.....Nov. 164
Tricot machine makes samples.....Jan. 148
Wale in knitted fabric is clearly defined Dec. 196
Warp knitting poses technical problems. O. B. Graham (F).....Feb. 143
Wet finishing of jersey may be semi-continuous .....May 186
Wider use seen for interlock knitting. H. Wignall (F).....Feb. 118

L

Laws—New decisions affect laws applying to mills. L. T. Parker (F).....Aug. 139
Lawsuits clarify textile-mill controversies. L. T. Parker (F).....Mar. 107
Linen—Bleaching process aided by caustic-soda desizing .....May 172

M

Maintenance

Aids in loosening nuts.....May 168
"T" purpose tool .....July 150
Broken cam levers eliminated by guard Sept. 188
Card-room counterbelt cleaned continuously .....Apr. 136
Centralized maintenance reduces mill's repair costs. E. D. White (F)...June 145
Cleaner, electric .....Sept. 178
Cleaning machine, small-parts.....Sept. 180
Comb box, ball-bearing, lubricated for 2 yr. .....May 162
Compressed-air systems need close attention (F) .....Oct. 116
Floor maintenance saves money. D. W. Barnes (F) .....Sept. 151
Frequent inspection aids sewing-machine upkeep. E. D. White (F).....Mar. 131
Full-fashioned machines require good lubrication. H. B. LeFeaux (F)...Dec. 143
Gear-tooth mold shapes built-up tooth July 162
Grease-cup wrench .....Aug. 160
Hand tools on simple rack.....Mar. 156
Homemade drill press.....Nov. 174
Length of pipe shapes bronze deposit.. June 158
Life of aluminum parts prolonged by soldering .....July 218
Lubricating-service cart .....Sept. 176
Magnet useful for picking up drop wires Aug. 160
Masonry rust stains removed.....May 170
Metallizing useful in textile machine shop. Roy Campbell (F).....Dec. 106
Oil cup used as glue can.....Feb. 162
Pipe-line strainers can reduce maintenance costs. R. E. Cochran.....June 118
Polarity easily checked.....Sept. 216
Pump life can be prolonged.....Jan. 170
Remove silicate deposits with caustic-soda bath .....Feb. 162
Screwdriver, spring-steel .....July 166
Sheet-metal cutter .....Dec. 176
Split tubing and clamps aid in rounding bent pipe .....Oct. 160
Stud adjustment aided by lock nut... Sept. 190
Suction aids in cleaning ball bearings.. Dec. 174
Support, adjustable, used as jack..Apr. 138
Swing-gate oiled by pipe cleaner..Jan. 158
Tapered-pin assembly held in place by setscrews .....May 170
Unique vacuum cleaner.....Aug. 141
Unsuited machine parts are a useless abuse .....Dec. 168
Washing of bearings.....Mar. 150
Worktable, movable .....June 160
Management—financing can be fitted to mill's circumstances. E. T. Neville (F) May 111
Marshall program .....Dec. 119
Mexico—two new textile mills near Mexico City are being built (F).....Mar. 123

Mill Engineering

Abrader produces uniform results..May 164
Air compressor stopped by exhaust of pop valve .....Apr. 138
Air conditioning in modern hosiery mill. H. B. LeFeaux (F).....Sept. 129
Air-conditioning influenced by temperature. P. L. Davidson (F).....Apr. 111
Air conditioning in tricot knitting mill (F) .....Jan. 124
Air-conditioning pays off in four Southern mills (F).....Aug. 111
Air filtering for yarn-package drying. H. L. Dozier (F).....June 135
Air separator .....Sept. 180
Aluminum has many uses in textile equipment. Charles Braglio (F)..Apr. 123
Are you underestimating materials handling? C. W. Bendigo.....Jan. 4
Bearing carries two types of motion... Dec. 164
Better handling methods offer large savings. W. B. McGuire (F).....Feb. 117
Central station air conditioning featured in modern Lumite mill (F).....Feb. 126
Chute to handle spinning bobbins..June 154
Cleanliness is essential to quality winding. P. M. Thomas (F).....Aug. 120
Coal silo increases boiler-room efficiency. E. D. White (F).....Sept. 139
Color scheme of departments.....Sept. 129
Compressed-air systems need close attention (F) .....Oct. 116
Conveyor cuts handling and saves floor space. H. R. Moore (F).....July 143
Conveyor equipped with shock absorber Sept. 186
Conveyor, gravity wheel.....Sept. 172
Cost reduction keynotes mill plans. W. A. Newell (F).....Nov. 103
Cylinder of sheet metal adds capacity to barrel .....July 166
Dehumidifier .....Dec. 164
Disposal of waste size aided by live steam .....July 178
Drain-pipe guard catches loose yarn.. Jan. 154
Drayton Mills air conditions weave room and alters building (F).....Mar. 123
Electronics control wool-card feed. Gustav Zellnik (F).....Sept. 145
Electronic meter .....Sept. 172
Electronic motor control.....June 148
Every "pick up" adds to handling cost. C. M. Bowden (F).....May 104
Flow chart for cotton (F).....Jan. 101-120
Fluorescent lamps, miniature.....Sept. 174
Fork lift truck operators trained by mill. Hadfield & English (F)....Nov. 112
Framework of building can be of welded pipe .....Sept. 188
Full-fashioned machines travel by special delivery. C. M. Bowden (F).. July 114
Functionalism is rule for modern mill building. L. V. Lacey (F).....Apr. 117
Gages, recording .....Sept. 172
Glass house for Duplan insulates for nylon throwing (F).....May 114
Grapple speeds wool handling. A. M. Stevens (F) .....July 137
Handling system need not be expensive. E. D. White (F).....Oct. 120
Handling systems speed tricot-mill production (F) .....June 116
Handtruck, welded steel.....Aug. 154
High temperature water as heat carrier. V. R. Freeman (F).....Jan. 129
Hoist, portable, has many uses.....May 174
Hook for handling bales.....Sept. 176
Hot-water heating saves fuel, maintenance .....Mar. 228
Humidity controlled at any temperature Dec. 166
Hydraulic power units for continuous operation .....Jan. 146
Industrial truck .....Mar. 148
Inspectors aided by reverse-side lighting Apr. 132
Installation technique for metallic card clothing. C. R. Pease (F).....Mar. 118
Iron bracket aids in gluing cartons.Dec. 176
Lees Mill shows advanced engineering (F) .....July 109
Lift truck .....Mar. 150
Materials-handling cost offers opportunity for savings. C. M. Bowden (F).. Jan. 121
Materials-handling hoists need safeguard .....Feb. 162
Materials-handling offers opportunities to save. P. M. Thomas (F).....Nov. 120
Mechanized floor maintenance saves money. D. W. Barnes.....Sept. 151

Mill should figure closely on its machine-shop needs. C. H. Smith (F)....June 131
Motors, heavy-duty ....June 150
Nozzle gives stream or spray....Sept. 177
One-story mills favored by modern engineering (F) ....Feb. 115
Pallets of plywood....June 150
Pallet, steel-wire ....Mar. 148
Paper pallets ....Apr. 127
Permanent magnets reduce fires and damage (F) ....Aug. 118
Pipe-line strainers can reduce maintenance costs. R. E. Cochran (F)..June 118
Power factor improvement will cut mill's electric bill. W. H. Cuttino (F)..Dec. 149
Pump handles abrasive liquids....Sept. 178
Pure water is basis for designating pH values ....July 170
Quarter-drive belts should have a half twist ....Apr. 136
Rack for stock....Feb. 166
Refrigerated air conditioning installed in cotton spinning room. C. M. Bowden (F) ....July 120
Rivet brake linings at proper points ....June 156
Roll-surface temperature obtained by thermocouple ....Jan. 148
Roof ventilator ....June 236
Saturated brine reduces costs at Dan River. Norman Agnew (F)....Aug. 135
Sealed construction featured in new hosiery mill. W. A. Newell (F)....Oct. 112
Signal lights mounted on shock absorbers ....May 174
Slack-chain switch protects hoist load ....May 172
Speed transmission ....Oct. 150
Steam ager ....Sept. 180
Strip heaters ....Sept. 188
Survey reveals plans for construction, renovation and modernization of mills (F) ....Nov. 104
Switch, sealed precision....Oct. 150
Textile industry's expenditures in 1947. W. B. Dall (F)....Nov. 101
Timbers on floor aid strapping of boxes ....Feb. 162
Torch has monel head....June 148
Truck of aluminum or fiber....July 152
Underground plants are feasible for textiles. J. A. McPherson, Jr. (F)..Mar. 114
Use rod and screws to center stock in lathe ....Jan. 154
V-belting, open-end ....Oct. 149
Water demineralizer ....Aug. 146
Water softener ....Aug. 144
Wool flow chart (F)....Aug. 101

N

Nylon

Cleanliness is essential in knitting dyed nylon ....Oct. 184
Double-end sizing speeds throwing. Apr. 138
Glass house for Duplan insulates for nylon throwing (F)....May 114
Modified yarn carrier reduces nylon press-offs ....July 160
New nylon-hose dye shows good wash fastness. C. M. Bowden (F)....Aug. 128
New type knitting cone for nylon..Nov. 178
Nylon staple in hosiery. Dr. W. B. Vincent ....Dec. 141
Processing nylon staple requires machinery fitness. R. S. Crowsley (F).. ....Aug. 114
Runs in nylon hose prevented by cardboard ....May 168
Stripping of size may be due to humidity ....July 174
Tester for evaluating the snag resistance of nylon hosiery. Smith & Johnson (F) ....Dec. 139

P

Peru—textile mills build own rayon plant ....May 240
Pete and Bill discussions—Jan. 161; Feb. 169; Mar. 161; Apr. 141
Philadelphia Textile Institute—National Textile Seminar (F)....June 133

Plastics

Acrylonitriles—a new class of synthetic fibers. J. V. Sherman (F)....Mar. 101
Industrial fabrics. C. W. Bendigo (F) ....May 4
Laundry nets of plastic....Feb. 180
Lumite mill featured central station air conditioning (F) ....Feb. 120
Monofilament techniques may be applied to Plexon (F)....Jan. 143
Plastics in the textile field. C. W. Patton ....Dec. 139
Terylene going into commercial production. F. B. Brewster (F)....June 123

Public Relations

Attract more good men, mill manager says ....Sept. 192
Cotton-textile industry launches public-relations program (F)....May 149
Foremen should have impartial attitude ....Mar. 168
Fork lift truck operators trained by mill. Hadfield & English (F)....Nov. 112
Functional clothing for employees at Reeves Mill (F)....Sept. 159
Indirect labor can be accurately controlled. T. H. Gallier (F)....Apr. 106
Job evaluation is a precision tool..Aug. 178
Job loads. C. W. Bendigo (F)....July 4
Labor-management forms council in Philadelphia (F) ....Sept. 288
Labor policy now top economic factor, CTI told (F)....Dec. 153
Labor-relations school set up by Botany Mills (F) ....June 111
Lawsuits clarify textile-mill controversies. L. T. Parker (F)....Mar. 107
Mill training courses free to veterans.. ....Mar. 168
New decisions affect laws applying to mills (F). L. T. Parker....Aug. 139
New labor law changes rights and duties. Benjamin Werne (F)....July 112
Overseers' office hours not a good practice ....Oct. 166
Pairer's rate of pay must include all styles ....Mar. 170
Personnel relations reach firmer ground. C. M. Bowden (F)....Feb. 116
Piece-rate pay systems can be applied to twisters ....Jan. 172
Profit-sharing plan interests mill man.. ....Dec. 190
Publicity aids labor procurement. H. S. Knowlton (F) ....Oct. 135
Shelton's fine labor program. J. M. Gregory (F) ....Nov. 141
Textile plants in the South. F. S. Lewis (F) ....Apr. 115
Training for all at Bigelow-Sanford. John Gagnon (F)....Dec. 103
Wanted: trained men. C. W. Bendigo (F) ....June 4
What are the qualifications of card-room cleaners? ....Oct. 178
What type of help is used for cleaners? ....Aug. 184
Women—Survey gives best working hours for women (F)....Mar. 127

Rayon Manufacturing

Acetate-rayon fabrics do not need saponifying ....Dec. 196
Air conditioning pays off in four Southern mills (F)....Aug. 111
Air-deflector plates improve card selvages ....Oct. 162
Air diffuser is adjustable. H. A. Baker (F) ....May 141
Air filtering for yarn-package drying H. L. Dozier (F)....June 135
Aluminum bobbin for use with adapter.. ....Oct. 216
Aluminum has many uses in textile equipment. Charles Braglio (F)..Apr. 123
American version of Sulzer loom..June 147
Apparatus tests shifting of yarn....Oct. 152
Avondale Mills installs hot-air slasher. W. E. Williams (F)....Oct. 133
Ball warps and cloth rolls protected.. ....June 160
Barmag twister ....July 150
Basle Fair focus for Swiss machinery. Harry Seligman (F)....June 137
Bemberg rayon printing aided by use of glycerin ....Oct. 160
Bleaching process aided by caustic-soda desizing ....May 172
Blender feeder ....May 232
Blending-feeder shafts protected against chokes ....Sept. 185
Bobbin refinishing machine....Aug. 148
Bolster cleaner ....Oct. 152
Brine equipment on lease basis....July 154
Broken lay ends prevented by brace... ....Feb. 160
Buffer positions shuttle and prevents rebound ....Aug. 150
Bumper on spooler-knotter....Sept. 182
"Butcher linen" appearance....Oct. 176
Calculating aids devised by Viscose... ....Nov. 160
California finishing plant expands 150% since 1941. R. L. Bean (F)....Feb. 137
Cardboard and carbon paper tests roll pressure ....July 162
Cationic softeners give permanent finish. C. N. Rabold (F)....Feb. 147
Caustic-soda treatment reduces barre in rayon ....Mar. 180
Circular-knit finishing. Irving Teplitz (F) ....June 129
Cloth conditioned by evaporated water.. ....Oct. 150
Cloth lowerer handles 120 rolls per day (F) ....Mar. 103
Cloth roll collapses for removal....May 231
Cloth rolls made of aluminum....Jan. 150
Cloth-roll piece-up sticks held in place. ....Nov. 176
Cloth-room machines handle large rolls ....Feb. 154
Conditioning time indicated by color... ....May 168
Continuous spinning of rayon by new process ....Nov. 157
Continuous welded aluminum beams offered ....Aug. 150
Cost knowledge vital to efficiency. L. F. Sawyer (F)....Nov. 155
Cotton or wool card processes rayon staple ....Nov. 192
Cottonless cotton mill (F)....Sept. 147
Crepe weaving aided by late harness timing ....Dec. 192
Delvisca yarn ....Jan. 168
Denkendorf reports advanced German technology (F) ....Mar. 133
Detachable box base useful for wet goods ....Dec. 172
Direction of yarn twist affects warp twill line ....Mar. 172
Diversified industry supports a rayon plant ....Mar. 182
Drop-wire contact bars should be kept off floor ....June 160
Educate loomfixers before installing looms ....Jan. 168
Electric feeler used with metallic bobbins ....Oct. 150
Electric heating pad dries printed fabrics ....Feb. 154
Electronic straighteners of two types. D. Eldred (F)....Oct. 123
Electronic warper drive gives constant yarn speed. R. J. Demartini (F)..Apr. 121
Europe fertile in machinery ideas. Rene Bouvet (F) ....June 127
Every "pick up" adds to handling cost. C. M. Bowden (F)....May 104
Feed-guide plates useful in formation of picker lap ....Apr. 132
Feed-plate extension improves lickerin feed ....Sept. 185
Fiber extensometer ....Aug. 143
Fibers in cross section are index to spinnability ....Sept. 218
Fiber sample dryer....Feb. 156
Financing can be fitted to mill's circumstances. E. T. Neville (F)....May 111
Finishing ranges efficient and flexible. C. N. Rabold (F)....Oct. 106
Fixers should know how to set builder. Guenther & Gross (F)....Oct. 139
Flat-brush bristles replaced with burnishing wire ....Dec. 176
Formula calculates average denier in a blend ....Oct. 168
France has shuttle-changing loom..Dec. 162
Fur on thread guide removes kinks from filling ....Jan. 158
Gage for setting picking shoes....May 174
Gage prevents run-outs in warping. J. A. King (F)....Feb. 246
Gas-fired curing ovens do not cause fading ....June 166
Gel strength measured by new device.. ....Oct. 234
Hacoba quiller achieves high production (F) ....July 118
Hand truck aids doffing of cards..Nov. 180
Handling systems speed tricot-mill production (F) ....June 116
Heated storage chamber aids opening of rayon ....Mar. 154
Horizontal padder is six machines in one ....May 162
Idler cone on picker provided with adjustment ....May 166
Improper winding of cloth corrected... ....Nov. 178
Indirect labor can be accurately controlled. T. H. Gallier (F)....Apr. 106
Inspecting machine ....Nov. 164
Inspection frames measure cloth....July 152
Japanese spinning frames are not superior to U. S....Apr. 144
Knitting company installs tricot machines (F) ....Jan. 124
Knitting yarns require skillful preparation. P. M. McNeal (F)....Mar. 116
Laboratory machine gives data on continuous dyeing. C. L. Zimmerman (F) ....Dec. 116
Lap preventer kink improved by felt cover ....Sept. 186
Lever and fulcrum aid in moving stirrup ....Aug. 159
Lickerin screens set with adjustable gage ....Oct. 158
Life of loom parts....July 184
Lifting rod aids inspecting patterns.. ....Sept. 186
Lockstitch sewing machine....Mar. 146
Locust-bean gum used in finishing..Apr. 159
Loom adjustment for rayon weaving (F) ....Dec. 114
Low-groove shuttle prevents jerked-in filling ....Sept. 170
Lowell Textile Institute celebrates Golden Anniversary (F)....May 159
Machine for single or double wrapping ....Aug. 144
Magnetic separators ....Apr. 274
Markers on loom box used for setting picker ....Nov. 174
Marketing and technology share forum at National Textile Seminar (F)..June 133
Materials-handling cost offers opportunity for savings. C. M. Bowden (F)... ....Jan. 121
Meters check linear speed....Sept. 180
Microscope camera ....Aug. 150
Mile-a-minute traveler must be right. Seth Carter (F)....Sept. 161
Mill purchases reach new high level. C. W. Bendigo (F)....Feb. 105
Missouri offers opportunity for textile development ....Oct. 224
Moisture content determined....Dec. 164
Moisture determined in a minute..July 156
"Monofilizing" main aim of rayon slashing (F) ....Oct. 115
Most-air cleaner made in Britain..Oct. 152
New emulsions for textile printing (F) ....Sept. 143
New method cuts time to install loom parts (F) ....Oct. 118
New system spins yarn from sliver. P. M. Thomas (F)....Aug. 126

(F) indicates feature article

1947 textile volume close to 1946. Sanford Parker (F)....Feb. 102
Oily-filling rack improves housekeeping ....Aug. 164
Oscillating roll holder....Mar. 156
Permanent finishes on rayon. Leonard Shapiro ....Dec. 141
Peruvian textile mills build own rayon plant ....May 240
Picker shim throws shuttle straight....July 166
Picker-stick economy. H. E. Wenrich (F) ....Aug. 124
Piece-rate pay systems can be applied to twisters ....Jan. 172
Pile-fabric loom ....Jan. 145
Pin-dryer operation aided by signal lights ....Dec. 178
Pin-dryer operator builds ladder on machine ....Apr. 134
Pin holes in shearing prevented....Oct. 160
Place drop-wires on warp before putting warp in loom....Oct. 165
Plied selvage yarn aids slashing...Jan. 152
Plying two ends of yarn on a winder ....Nov. 174
Precision tester ....Nov. 166
Process control device....Jan. 146
Properties of synthetic fibers (F)....Sept. 113–128
Pull-skein winder doffs automatically ....Feb. 156
Rack for spools of yarn....Dec. 174
Reducing warp stretch by cutting down roll ....Aug. 159
Report from India on textile-industry developments. J. K. Van Denburg Jr (F) ....Sept. 108
Resin treatment improves fiber strength ....Dec. 162
Resist printing demands close attention to details. T. N. Patrick (F)....Mar. 139
Revolving creel useful on some winders ....July 165
Ribbons with plain patterns may be cut after printing....May 182
Roll covering conducts electricity...July 149
Roller-pressure pull measured by indicator ....Sept. 180
Saco-Lowell announces machinery improvements ....Nov. 164
Sandwich blend made mechanically..Oct. 149
Scissors of new type....Feb. 224
Scutcher, stainless-steel ....Dec. 166
Selvage loops prevented by filling control ....Dec. 176
Semiautomatic doffing needed for spinning ....Nov. 186
Separating pins prevent shady filling ....Aug. 156
Sewing machine pulleys will align themselves ....June 156
Shape of box binders can cause much loom trouble. H. E. Wenrich (F).Feb. 125
Shuttle-box stop prevents loom damage ....June 154
Shuttle designed for S-6 loom....Dec. 166
Shuttle with increased capacity....Nov. 166
Singeing speeds improved by "radiant-flame compression." J. C. Moore (F) ....June 112
Slack washer has partitioned tank..Dec. 164
Sliver and yarn tester....Mar. 148
Slub effect in cloth can be attained by design ....Jan. 174
Small blending plant might be successful ....Apr. 154
Small cores in beams no benefit. R. J. Demartini (F) ....Jan. 133
Soaking machines handles skeins or cakes ....Feb. 156
Spain's textile mills. G. S. Underwood (F) ....July 101
Spindle efficiency increased by ball-bearing ....Aug. 160
Spindleless redraw winds 500 yd. per min. ....Nov. 162
Spinner's task can be set quickly. Gunther & Gross (F)....Apr. 108
Spinning machine drafts without rolls. C. W. Bendigo (F)....Mar. 113
Spinning technology advanced by Georgia mills (F)....May 155
Spooler-drum laps removed with hook ....Oct. 160
Spray for tinting....June 156
Squeeze-roll cover of synthetic rubber ....Sept. 176
Staple spins well on worsted system (F) ....Oct. 129
Starter and full cheese transferred ....Jan. 156
Static eliminator is self-contained..Feb. 154
Steel roll cleaner....Oct. 218
Stiffness tester ....Sept. 172
Storing full beams aided by wooden rests ....May 170
Straight-wire clothing is not successful ....Aug. 168
Stream-sanitation research is four-fold (F) ....July 125
Surface temperature continuous control ....Dec. 156
Survey reveals plans for construction, renovation and modernization of mills (F) ....Nov. 104
Swatch filing cabinet....Jan. 146
Swing guider ....Dec. 156
Swiss machines, new, now available ....Dec. 162
Swiss warp-tying machine....Dec. 156
Synthetics survey (F)....Sept. 113–128
Table for figuring weight of yarn..Dec. 172
Table of commercial synthetic yarns and fibers ....Sept. 113
Tensile strength tester....Nov. 162
Tension device aids trimming shuttle fur ....July 157
Tester for textiles....Mar. 146
Tester measures yarn shift in fabric ....Jan. 148
Textile dip under way. Sanford Parker (F) ....May 101
Textile Exposition fills Grand Central Palace (F) ....July 147
Textile industry's expenditures in 1947. W. B. Dall (F)....Nov. 101
Textiles move on wheels (F)....Feb. 131
Textile plants in the South. F. S. Lewis (F) ....Apr. 115
Textiles show power to reach new heights. W. B. Dall (F)....Feb. 101
Third and fourth shuttles operate as first, second ....Oct. 162
Time saved in picking double leases ....Dec. 174
Tongue and groove compresses drawing sliver ....Apr. 148
Traverse-bar extension prevents bunching of yarn....July 165
Tricot machine....June 240; Dec. 158
Tricot machine makes samples....Jan. 148
23rd annual synthetics survey (F)..Sept. 113
Twist-setting installation improves mill's weaving. C. M. Bowden (F)....May 116
Twister rolls have chrome-plated finish ....Dec. 160
Ultrasonics being used on textiles..July 220
Ultraviolet light used for testing cloth ....May 172
Uniform yarns are made by modern machines. J. J. Mills (F)....June 143
Unit dries samples....Aug. 152
USA 1950-1960 (F) [Forecast by 20th Century Fund] ....May 121–136
Vacuum-stripping plate should be beveled ....Dec. 178
Vat and azoic colors preferred for printing. Dr. A. K. Saville (F)....Aug. 122
Viscose-rayon goods may need bleaching ....Mar. 184
Warper beam travels to slasher on carriage ....May 164
Warper-shaft extension aids in removing brakes ....Nov. 176
Warper thread-roll nut requires special tool ....Sept. 190
Weaving method yields single-pick effect ....May 177
Weaving results influenced by lug straps. H. E. Wenrich (F)....May 151
Weaving wire screen is expensive process ....Aug. 182
Wild filling can be easily studied. C. D. Brown (F) ....Nov. 114
Williams unit changes dye techniques. S. H. Williams (F)....May 143
Winder aided by slide-rule calipers..Oct. 154
Winder guideway set with gage....May 172
Winder requires no yarn tension..Mar. 161
Wool spinners contribute to cellulose technology ....Feb. 172
World textile production—symposium (F) ....Feb. 106
Wrinkle-resistance gage ....Dec. 158
Wrong ends reduced by educating weavers ....Nov. 173
Wrong type of quill should not be used ....Oct. 166
Yarn-tension tester ....July 156

Research

Conversion method aids plant and laboratory ....Jan. 154
Efficient laboratory a "must" for modern finishers (F) ....Mar. 129
Fiber cross-section cut with microtome ....Mar. 186
Future for textiles. J. F. Smith (F).. ....Feb. 111
Institute of Textile Technology combines degree granting with research. M. C. Powers (F) ....June 103
Laboratory oven....Feb. 223; July 156
National Textile Seminar discusses marketing and technology (F)....June 133
Dan River completes research organization. C. M. Bowden (F)....Mar. 104
Stream-sanitation research is four-fold (F) ....July 125
Tests of warp size is in the weaving. Dr. P. V. Seydel (F)....June 125

Mill purchases reach new high level. C. W. Bendigo (F)..... Feb. 105
Missouri offers opportunity for textile development ..... Oct. 224
Moisture content determined..... Dec. 164
Moisture determined in a minute.. July 156
1947 textile volume close to 1946. Sanford Parker (F)..... Feb. 102
Oily-filling rack improves housekeeping ..... Aug. 164
Pencil stripe in worsted requires clean-cut weave. R. B. Sendren (F)... Jan. 137
Pick trouble elimination will reduce mill's mending costs. E. P. Schremp (F) ..... July 123
Picker shim throws shuttle straight.. July 166
Picker-stick economy. H. E. Wenrich (F) ..... Aug. 124
Pile carpet knitting—British patent. Harry Wignall (F)..... Nov. 149
Pile-fabric loom ..... Jan. 145
Pilling in garments reduced by using positively charged rubber..... Oct. 172
Pin-dryer operation aided by signal lights ..... Dec. 178
Pin-dryer operator builds ladder on machine ..... Apr. 134
Pin holes in shearing prevented.... Oct. 160
Place drop-wires on warp before putting warp in loom..... Oct. 165
Plying two ends of yarn on a winder.. Nov. 174
Precision tester ..... Nov. 166
Process control device..... Jan. 146
Processes used for printing woolens. Nov. 196
Pull-skein winder doffs automatically.. Feb. 156
Rack for spools of yarn..... Dec. 174
Revolving creel useful on some winders ..... July 165
Rivet brake linings at proper points... June 156
Roll covering conducts electricity July 149
Roller-pressure pull measured by indicator ..... Sept. 180
Saco-Lowell announces machinery improvements ..... Nov. 164
Sandwich blend made mechanically. Oct. 149
Scissors of new type..... Feb. 224
Scouring, washing, dyeing operations combined ..... Aug. 154
Scutcher, stainless-steel ..... Dec. 166
Selvage loops prevented by filling control ..... Dec. 176
Sewing machine pulleys will align themselves ..... June 156
Shape of box binders can cause much loom trouble. H. E. Wenrich (F). Feb. 125
Short wool fibers cause "pilling" on garment ..... Sept. 192
Shuttle-box stop prevents loom damage. ..... June 154
Shuttle with increased capacity.... Nov. 166
Skein reelers ..... Jan. 146
Sliver and yarn tester..... Mar. 148
Slub-catcher anvil for abrasive yarns.. Oct. 150
Small cores in beams no benefit. R. J. Demartini (F) ..... Jan. 133
Spain's textile mills. C. S. Underwood (F) ..... July 101
Spindle efficiency increased by ball-bearing ..... Aug. 160
Spinner's task can be set quickly. Gunther & Gross (F)..... Apr. 108
Spinning machine drafts without rolls. C. W. Bendigo (F)..... Mar. 113
Spring-needle machines need non-skid stop ..... Oct. 160
Squeeze-roll cover of synthetic rubber... Sept. 176
Staple spins well on worsted system (F) ..... Oct. 129
Static eliminator is self-contained.. Feb. 154
Stiffness tester ..... Sept. 172
Storing full beams aided by wooden rests ..... May 170
Stream-sanitation research is four-fold (F) ..... July 125
Stroke of rub aprons depends on wool stock ..... Dec. 192
Surface temperature continuous control ..... Dec. 156
Survey reveals plans for construction, renovation and modernization of mills (F) ..... Nov. 104
Swatch filing cabinet..... Jan. 146
Swiss machines, new, now available. Dec. 162
Swiss warp-tying machine ..... Dec. 156
Table used for figuring weight of yarn.. ..... Dec. 172
Tensile strength tester..... Nov. 162
Tension device aids trimming shuttle fur ..... July 158
Tester for textiles..... Mar. 146
Textile dip under way. Sanford Parker (F) ..... May 101
Textile Exposition fills Grand Central Palace (F) ..... July 147
Textile industry's expenditures in 1947. W. B. Dall (F)..... Nov. 101
Textiles move on wheels (F)..... Feb. 131
Textiles show power to reach new heights. W. B. Dall (F)..... Feb. 101
Thickness gage measures felt..... Aug. 152
Third and fourth shuttles operate as first, second ..... Oct. 162
Thread guide gives better color control ..... Mar. 152
Time recorder measures woolen-card efficiency. Gustav Zellnik (F).... Apr. 276
Time saved in picking double leases.. ..... Dec. 174
Tinting wools ..... Dec. 198
Ultrasonics being used on textiles.. July 220
Ultraviolet light used for testing cloth ..... May 172
Unbalanced twill is best for suede.. Feb. 188
Unit dries samples..... Aug. 152
Weaving method yields single-pick effect ..... May 177
Western wool-scouring plant poses questions ..... Apr. 152
Wild filling can be easily studied. C. D. Brown (F) ..... Nov. 114
Winder aided by slide-rule calipers. Oct. 154
Winder guideway set with gage.... May 172
Wool flow chart (F)..... Aug. 101–110
Wool raw stock processed in modernized dyehouse. M. H. Hudson (F).... May 112
Wool spinners contribute to cellulose technology ..... Feb. 172
Woolen card has 96-in. cylinder.... Feb. 153
Woolen-mill efficiency raised by spare hands. Gustav Zellnik (F)..... Feb. 141
World textile production—symposium (F) ..... Feb. 106
Worsted burling cost is figured by the cut ..... Nov. 192
Worsted frame has rising drafting field ..... Dec. 155
Worsted warping tension..... Sept. 198
Wrong ends reduced by educating weavers ..... Nov. 173
Wrong type of quill should not be used ..... Oct. 166
Yarn-tension tester ..... July 156
